SUMMARY

Full-stack and AI engineer who ships production software solo — React/TypeScript front ends, Python/FastAPI back ends, and LLM/agent systems (MCP, RAG, multi-provider APIs). 15+ projects shipped and three paying client retainers in production. Built Portmint, a self-serve SaaS that deploys branded, per-business AI assistants. Comfortable owning a product end to end: spec, build, deploy, and the customer conversation.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, SQL, Swift
- **Frontend:** React 18, Next.js, Vite, Tailwind CSS, Framer Motion, Capacitor (iOS/Android), PWAs
- **Backend & Data:** FastAPI, Node.js, Supabase, PostgreSQL, SQLite, Stripe, REST, WebSockets, asyncio
- **AI Engineering:** LLM APIs (Anthropic, OpenAI), MCP, agent orchestration, RAG, prompt & agent design
- **DevOps & Cloud:** Vercel, GitHub Actions, serverless / edge functions, CI/CD, Git
- **Quant:** EV modeling, fractional-Kelly sizing, backtesting, regime detection
- **Certification:** CompTIA A+

SELECTED PROJECTS

Portmint — *Self-serve AI-assistant SaaS* 2026

- Built a platform that turns any business website into a live, branded AI assistant in about a minute, then provisions itself into a paying client with no redeploy.
- React + serverless front end; a Python/FastAPI platform builds secure, least-privilege integrations into real business systems; Stripe subscription tiers and a self-serve CRM for captured leads. Auto-install flows for Shopify, WordPress, Wix, Squarespace, and Webflow, plus an official WordPress plugin.

React · TypeScript · Python · FastAPI · Stripe · Vercel · LLM / agent orchestration

FableKalshi — *Multi-strategy quant trading system* 2026

- Async Python system trading Kalshi crypto-binary markets: four strategies plus an ensemble in parallel, with shadow-trading and automatic promotion when a candidate clears thresholds.
- Gates every order through fee- and slippage-aware EV math with fractional-Kelly sizing; automatic kill switches halt entries on drawdown, loss streaks, or stale data. Every decision logged for bit-for-bit replay.

Python · asyncio · WebSockets · SQLite

Saratoga Handicapper — *AI horse-racing analytics PWA* 2025

- PWA + FastAPI backend ingesting live odds and race cards; runs Kelly-fraction staking on edge-positive races and uses an LLM for natural-language pace and trip analysis.

React · Vite · FastAPI · LLM API

Client Retainers — *three production sites + CRMs* 2025–2026

- Marketing sites and back-office CRMs for a restaurant, a private champagne society (shipped to iOS, Android, and web from one Capacitor codebase), and an LTC-insurance practice — each owned solo from design through deploy and ongoing support.

React · Vite · Capacitor · Vercel · Supabase · PostgreSQL

EXPERIENCE

Assistant Manager, *Standard Fare (Sure Thing Hospitality)* — Saratoga Springs, NY Jul 2025 – Present

- Helped launch the location; own POS configuration, nightly financial close, and staff training. Led top guest-satisfaction metrics. (Concurrent with full-time independent development work.)

Support Engineer I, *cb20* — Saratoga Springs, NY Dec 2024 – May 2025

- Front-line IT support (remote and on-site) for managed-services clients; drove phone-answer rate from 30% to 95% and CSAT to 4.9/5.

EDUCATION

Flatiron School — Full-Stack Web Development (Python, JavaScript, React, Flask, SQL) 2023

SUNY Geneseo — B.A., Communication (*semesters at La Sorbonne & Sciences Po, France*) 2022

Hudson Valley CC — A.S., Entrepreneurship & Sustainable Technologies 2019
